Summary

- Dedicated Frontend Developer with 3.9 years of experience crafting intuitive, responsive web applications.
- Skilled in leveraging SaaS-based application, modern JavaScript frameworks like React and Next.js to deliver exceptional user experiences.
- Proficient in React, global state management, API integration, Reusable component and translating design concepts into functional code.
- Experienced in working within Agile methodologies, collaborating effectively with cross-functional teams to ensure timely and efficient project delivery.

Skills

- **Frontend Technologies:** React.js, Next.js, Typescript, JavaScript, jQuery, Ajax, HTML5, CSS/SCSS, TailwindCSS, Webpack
- **Backend:** Node.js, Express.js, RESTful API, MongoDB
- **Version Control:** Git, GitHub, Gitlab
- **Payment Integration:** Stripe
- **Frontend tool:** Redux, Redux-Toolkit, Axios, RTK Query, Tan-Stack Query, Jira
- **Devops:** AWS, Docker
- **Soft Skills:** Effective team collaboration, excellent in verbal and written communication, problem solving

Professional Experience

Rishabh Software Pvt Ltd | (Frontend Developer)

Since Jul 2023...

[Link](#) | **Sober Living App Enhancement** (Healthcare domain)

- Worked with cloud-based development and follow the best practices to define and, launch new Features, resulting 30% reduction in system errors, and improve application performance by 30%
- Developed an Owner Dashboard form for registering facilities PH, IO, Residential, Detox.
- Led to a 20% increase in user registrations and a 25% increase in successful transactions through effective dashboard design and payment integration & implemented micro frontend architecture
- Ensure compliance with company policies and industries in security and data privacy.
- Reduced project delivery time by 15% by accurately estimating development timelines based on design analysis.

[Link](#) | **HAVER ERP Re-Engineering** (ERP Tool)

- Led Agile development sprints, & designed and implemented optimized, reusable components & RTK Query for the Item Purchase Module, which enhancing user experience and performance by 30%.
- Improved performance issues by 25% by identifying and resolving bottlenecks and bugs in the application
- Resolved UI inconsistencies and cross-browser compatibility issues to enhance the user experience.
- Utilized React.js to build reusable components, ensuring maintainability and 100% scalability.
- Identify and resolved bottleneck, bugs in result improved performance issue by 25%

Nlineaxis IT Solution Pvt Ltd | (Frontend Developer)

Mar 2021 – June 2023

[Link](#) | **Tutort** (Ed-Tech)

- Crafted clean, maintainable and strong emphasis on performance, ensuring optimal application functionality.
- Streamlined user security & access management through the implementation of role-based access control, resulting in a 30% reduction in unauthorized access incidents
- Optimized Stripe payment gateway integration, which improved transaction success rates by 15%.
- Developed and optimized UI/UX design for multiple platforms, leveraging and AWS; enhanced user engagement by 40% and reduced load time by 30% through strategic architecture improvements.

Education

B-Tech (Computer Science & Engineering)

University of Engineering & Management | 2021
